Lesson materials

Grades 8-10 | AI literacy | Assessment | 30 minutes

Work independently using only the fictional club records. Evaluate the explanation rather than guessing personal qualities from a name.

Vocabulary	Meaning
criterion	A stated requirement for a decision.
assumption	Something treated as true without enough supporting evidence.
consistent	Applied in the same way across comparable cases.

Club role criteria

A poster helper must be available Tuesday and must have completed the safety briefing. Art experience is helpful but is not required.

Candidate records

Mina: Tuesday available; safety briefing completed; no previous poster experience. Theo: Tuesday unavailable; safety briefing completed; two poster projects. Sam: Tuesday available; safety briefing not yet completed; one poster project.

Fictional AI recommendation

Choose Theo because experienced artists are always more dependable. Reject Mina because beginners cannot help with posters.

Assessment directions

Check both required criteria for each person. Do not invent missing facts. Explain what must change before another candidate could qualify.

Student response sheet

Grades 8-10 | AI literacy | Assessment | 30 minutes

Name _____ Date _____

Use page 2 as your reference. Explain your reasoning and cite relevant details.

1. Who currently meets both required criteria? Cite both record details.

2. Why does Theo not currently qualify, despite poster experience?

3. Identify one unsupported assumption in the AI explanation and explain why it is unsupported.

4. What documented change would allow Sam to meet both requirements? Explain.
