Lesson materials

Grades 8-10 | AI literacy | Escape room | 35 minutes

Unlock the school-news archive with three evidence decisions. All source records are fictional. Source IDs identify the documents; they are not web addresses.

Vocabulary	Meaning
attribution	Naming the source of information or wording.
quotation	Exact words from a source, marked as quoted.
paraphrase	A restatement in new wording that still credits the source.

Source A: garden log

Garden log, October 6: The class planted eight bean seeds on Monday.

Source B: library note

Library note, October 6: The reading display includes twelve new books.

News draft

The class planted eight bean seeds on Monday. The library has twelve new books on its reading display. The garden will produce a hundred beans next month.

Three locks

Lock 1: source for the seed count: A = 3; B = 8. Lock 2: exact copy of a source's words should be marked as a quotation and credited: yes = 6; no = 2. Lock 3: the hundred-beans prediction is established by these records: yes = 1; no = 4.

Student response sheet

Grades 8-10 | AI literacy | Escape room | 35 minutes

Name _____ Date _____

Use page 2 as your reference. Explain your reasoning and cite relevant details.

1. Give the Lock 1 digit and name the source supporting the seed count.

2. Give the Lock 2 digit. Explain what exact copied wording needs.

3. Give the Lock 3 digit and explain the evidence limit.

4. Write the final code and a paraphrase of Source B that credits the source.
