# Lesson materials

Grade 7 | ESL | Escape room | 35 minutes

Solve three locks to identify a fictional lost backpack. Read carefully: color alone is not enough. In a real school, follow the office's process for claiming lost property.

| Vocabulary | Meaning |
|---|---|
| striped | with a pattern of lines |
| front pocket | a small storage space on the front of a bag |
| claim | ask for an item that belongs to you |

## Lost notice

My backpack is blue with white stripes. It has one front pocket. A small green key ring is attached to the handle. Please take it to the school office.

## Found-item record

Bag A: blue, plain, two front pockets, no key ring. Bag B: blue and white stripes, one front pocket, green key ring. Bag C: red and white stripes, one front pocket, green key ring.

## Office note

Found bags are kept in the office. A learner should describe the bag to an office staff member before claiming it.

## Three locks

Lock 1, matching bag: A = 2; B = 7; C = 9. Lock 2, number of front pockets: one = 4; two = 6. Lock 3, where to ask: office = 3; gym = 8.

# Student response sheet

Grade 7 | ESL | Escape room | 35 minutes

Name _____ Date _____

Use page 2 as your reference. Explain your reasoning and cite relevant details.

1. Give the Lock 1 digit. Name two details supporting the matching bag.

2. Give the Lock 2 digit and write a sentence describing the front pocket.

3. Give the Lock 3 digit. Name the person the learner should ask.

4. Write the final code and a polite English request to the office staff.
